

# I-Corps@NCATS Short Course for Chicago ITM Members

Loyola University Chicago's Parkinson Center for Health Innovation and Entrepreneurship is hosting an I-Corps@NCATS Short Course designed to provide teams of biomedical scientists, clinicians, faculty researchers, post-docs, and students with training to accelerate the translation, dissemination, and implementation of their health discoveries and innovations from the lab to clinical practice to populations.

## Why You Should Attend:

The free, virtual 4-week course based upon premier NSF and NIH I-Corps entrepreneurial training programs will help you and your team connect with potential end users and customers for your research projects, programs, protocols, prototypes, services, and solutions, where you can:

- **Develop a new way of thinking about how to value the impact of your research**  
(See how the methodology has helped innovators like you: [Development of a Health Information Technology Tool for Behavior Change to Address Obesity and Prevent Chronic Disease among Adolescents](#); and [Customer discovery as a tool for moving behavioral interventions into the marketplace](#))
- **Expand your network of innovation partners, mentors, and potential collaborators** – including connections to Chicago business incubators and organizations (such as [MATTER](#), [1871](#), [mhub](#), and others)
- **Leverage funding to support projects for selected teams** – Course graduates can apply for future funding from ITM and NSF
- **Spring 2023 Virtual Program Dates and Times – Thursdays & Fridays, 9 am – 12 pm**

*February 23-24*

*March 2-3*

*March 9-10*

*March 16-17*

**For more information, join a Zoom information session on December 2, 9 or 16 @ Noon**
